Globe International Ltd

I work part time, and as with most payroll positions have very strict timelines to meet. Company growth led to a significant increase in my workload and it was becoming increasingly difficult to meet all deadlines. The installation of the iDtec software has enabled me to successfully manage the payroll process and provide much more meaningful reports to management.

The implementation process was smooth and the ongoing support has been exceptional. Our company has grown further since our original implementation and all of our requirements have been met by the efficient and proficient iDtec staff. I love the functionality and ease of use of the system - we managed to roll the program out to retail stores and have the Store Managers using it effectively after providing them with less than an hours training and some simple notes copied from the manual! I would recommend the software to anyone - iDtec has enabled me to increase my output and maintain my work/family life balance as well, so my family would recommend the product too.

Princes Fabricare

Our 90 staff working two shifts use the system from iDtec to clock in and out. The system is great and saves me three hours each payday by automating the process and interfacing to our payroll software. iDtec has been fantastic in all aspects of providing us with our system, James has given the best possible after sales service.

Tech Plas Pty Ltd

"We have around 40 employees working in a technical environment manufacturing plastic pipes and custom extrusions. With the use of iDtec's robust fingerscan time clock we have a more accurate account of employees' attendance and the associated payroll expense of our 24 hour operation. Our administration staff is very pleased with the simplicity and efficiencies gained since eliminating manual time cards.

The automatic calculation of our award rules is saving several hours, making pay day easier and stress free. Summary data is interfaced to our payroll system providing further time savings.

iDtec has been very helpful during installation and when support is needed. We look forward to working with the team at iDtec in the future.
